The Original ROBERTSON®

Fastening System | System de Prise

To avoid any problems make sure you're using a matching Robertson® screw and driver to ensure the proper fit. At Robertson it's the wedge fit that gives us our cling fit feature. We construct the complete fastener system and were able to offer the true recess that PL Robertson invented over 100 years ago – The Robertson® Drive.

ROBERTSON® "CLING FIT" PRISE ROBERTSON® AJUSTÉE

ROBERTSON® Bits and Screws provide maximum recess penetration and "Cling Fit".

Les viset embouts ROBERTSON® procurent une pénétration maximale et une "Prise Ajustée".

RECESS TOO NARROW EMPREINTE TROP ÉTROITE

When the recess is too narrow, the driver does not penetrate deep enough into the recess.

Lorsque l'empreinte est trop étroite, la pointe de tournevis ne pénètre pas assez profondément dans l'empreinte.

RECESS TOO LARGE EMPREINTE TROP LARGE

When the recess is too large, the driver will wobble and cam out.

Lorsque l'empreinte est évasée, l'embout ne sera pas ferme et une effet de rebond pourrait se produire.

INCORRECT RECESS ANGLE ANGLE DE L'EMPREINTE INCORRECTE

When the recess or bit is at an incorrect angle, the driver will wobble excessively.

Lorsque l'embout ou l'empreinte se présente à un angle incorrecte, l'embout va osciller.
